LinkedIn: www.linkedin.com/in/tomiwakukoyi
Email: Tomiwakukoyi07@gmail.com

SKILLS

Programming Languages: JavaScript, TypeScript, Python, C#

Frameworks/Libraries: React.js, Next.js, Nest.js, Prisma, Vue.js, Node.js, Tailwind CSS, GraphQL, Redux

Tools: AWS, Firebase, Git/GitHub

WORK EXPERIENCE

National Information Technology Development Agency (NITDA)

08/2024 – Present

Frontend Developer

While working as a frontend developer for NITDA I have,

- Repeatedly built frontend applications ready before the deadline thereby leading to faster development process all round.
- Ensured to make the best and most responsive mobile versions of Frontend applications to ensure usability for all our users.
- Worked with technologies like Typescript, Nest.js, Next.js, React, Tailwind CSS and other technologies showing my versatility and skilfulness

Aplentify

05/2024 – 07/2024

Frontend Developer

While working remotely as a frontend developer for Aplentify I have so far,

- Collaborated with a team of UI/UX designers to implement clean and functional frontend.
- Worked mainly with Typescript and React with Tailwind CSS.
- Made use of Git and GitHub to manage code and workflow.

Ambify UK

05/2023 – 07/2024

Full stack Developer (Frontend and AWS)

I worked fully remote for this UK startup creating a solution for construction workers, helping them measure the level of CO2 around their environment. I particularly,

- Developed responsive Next.js dashboard using Tailwind CSS in collaboration with designers.
- Built an Impromptu landing page to meet a pitch event in less than 12 hours.
- Led the web development frontend team including Frontend developers and UI/UX developers
- Translated data from Dynamo DB to Frontend.
- Developed and deployed APIs using AWS AppSync and optimized queries with GraphQL.
- Utilized various AWS services including S3, DynamoDB, Cognito, and IoT Core to build a robust backend infrastructure.
- Worked with Context API for managing state.

Mein Sherpa

01/2023 – 09/2023

Frontend Developer

Worked fully remote as a Frontend Developer using Vue JS with this German based startup where I,

- Created and maintained user interfaces for web applications using Vue.js and Tailwind CSS.
- Translated design mock-ups into functional UI code, ensuring visual appeal and intuitiveness.
- Established effective communication channels with backend developers for seamless integration.
- Utilized API data within frontend applications to optimize functionality and user experience.

Ministry of Science and Technology, Lagos State

08/2022 – 12/2022

Project Manager Intern

As an intern at MOST carrying out project management duties at that level I,

- Collaborated within cross-functional teams, actively engaging in the product lifecycle from concept to deployment.
- Engaged in stakeholder meetings, delivering updates on progress while collecting and incorporating valuable feedback.
- Executed comprehensive product testing and analysis, yielding insights into user behaviour and enhancing product performance.
- Gained proficiency in agile product management, market research, and project.

Linux Jobber

06/2022 – 09/2022

Frontend Developer Intern

As an intern at Linux Jobber after learning React JS and related tools, I got this internship role and I,

- Collaboratively developed and enhanced web application features using React.js and modern styling libraries.
- Built reusable React components and implemented hooks for code maintainability and scalability.
- Adhered to React best practices for efficient and maintainable code across multiple applications.
- Made use of Redux for state management

EDUCATION

University of Wolverhampton

Jul 2024 - Present

MSc Computer Science + Artificial Intelligence (In view)

University of Lagos

Sep 2017 - Jun 2023

BS, Mathematics

Harvard X

Aug 2022 - Nov 2023

Introduction to Computer Science

University of Lagos

Sep 2017 - Jun 2018

Diploma, Computer Science
